ABSTRACT OF THE DISCLOSURE

A vehicle inner belt molding to be fitted along an interior of an opening edge of an

elevating window in a vehicle. The vehicle has a door inner panel and a trim board being

attached to the door inner panel and having a downward flange portion protruding therefrom.

The vehicle inner belt molding includes a fitting portion to be attached to the door inner

panel, and a sealing lip formed integrally with an exterior side of the fitting portion to be in

elastic contact with an inner surface of the elevating window. The fitting portion has an

upward opening groove fittable with the downward flange portion.
